THIS UNIQUE COURSE INCLUDES:

• A comprehensive syllabus and instructional videos on scope care
• 20+ hours of online didactic training and online assessments
• 6 days of hands-on laboratories – a mix of dry, cadaver and live animal laboratories for optimal learning and mastery of the material

PARTICIPANTS WILL LEARN:

• Flexible and rigid scope anatomy, handling and cleaning
• Laser physics, handling and safety
• Cystoscopy and lithotripsy
• Rhinoscopy
• Bronchoscopy
• Upper and lower gastrointestinal endoscopy
• Laparoscopy
• Thoracoscopy
• Associated advanced procedures

ONLINE TRAINING BEGINS: DECEMBER 13, 2015
LABORATORIES: MARCH 14-19, 2016

This course is specifically designed to meet the needs of small animal residents and specialists desiring in-depth scope training. Offered by The University of Tennessee College of Veterinary Medicine with the support of Karl Storz Veterinary Endoscopy.
ONLINE TRAINING
Each topic will be presented online in a series of 30-minute modules that may be replayed individually for integration into the typical clinician’s busy lifestyle. Information covered will include equipment required, case selection and anesthetic considerations, procedural techniques, tips and tricks, and complications. After each topic is completed, a quiz will be given to assess the participant’s learning. The online training portion is completed by the participant at his/her own pace.

ONLINE TRAINING MUST BE COMPLETED BY MARCH 13, 2016
