

## Comparative and Experimental Medicine News

Doctoral student Rebekah Kennedy featured on MedicalXpress.com

The work of Comparative and Experimental Medicine doctoral student Rebekah Kennedy was recently featured in Medical Xpress, a web-based medical and health news service. Her work focuses on triclocarban (TCC), an antimicrobial agent that is frequently added to bar soap.

"Our research adds to the growing body of scientific literature suggesting unintended health consequences related to nonprescription antimicrobial use and will allow pregnant and nursing mothers to make informed decisions regarding use of these antimicrobial products," Kennedy said.

Kennedy is studying under [Dr. Jiangang Chen](#), assistant professor in the Department of Public Health in the College of Education, Health & Human Sciences.
