DR. BARRY ROUSE

"My surprise at being alive and still feeling intellectually equal or even superior to my peers."

— DR. BARRY ROUSE

STEPHEN TINKEL

"After four decades assisting with the education of so many bright and wonderful people, I enjoy hearing the "oh wow, I get it now" response. Secondly, has been my education from a different view point and prospective. We have so many opportunities to learn new techniques, new equipment. I have learned so much just being the "fly on the wall" during surgical procedures. Lastly and this sounds the cheesiest, it is the family we work with day in and day out. I thank you."

GINA GALYON

"I would have to say that being part of a fabulous team of individuals that are so smart and caring is what I have enjoyed most. It is infectious to be among so many bright and compassionate individuals. It makes a good veterinary team member want to be a great one."

LILLIAN GERHARDT

"My time at UTCVM has been an adventure. Working with exotics and wildlife makes everyday a new challenge, even after 30 years. I have had the opportunity to work with the best doctors, students, technicians and assistants. Also I have made wonderful friends during this journey."

DR. STEPHEN KANIA

"When I first arrived at UT 30 years ago, Barry Rouse was a grumpy old man, we yearned for a good food service, and UT had a top ranked baseball team. Someone told me how to write an email address and I replied 'what is an at sign?' Today, I walked through the campus accompanied by cute, little, artificially intelligent, food delivery robots. Times have changed but our commitment to our mission of teaching, service and the advancement of science has never wavered."

CHRISTINE WEAVER

Christine Weaver has been a valued employee in LACS for many years. Christine is dedicated to her work – rain or shine, wind or snow, hot or cold – she makes sure we have a safe place to teach and do great work. Life would be very tough without Christine in it!
