

UTCVM Diagnostic Images

Do you need digital copies of your pet's diagnostic images that were taken while at UTCVM Veterinary Medical Center?

Let us know which option you prefer and we will be happy to provide them. The standard format of these images is DICOM, but if needed, JPG or TIFF files can be provided.

CD/DVD

On request, your pet's diagnostic images can be provided on a disc when they are discharged. If needed, the disc of images may be sent through conventional mail.

DROPBOX

If you have a Dropbox account and would prefer to receive your pet's images by that method, simply provide the email address associated with your account and we will share the files with you.

EMAIL

If you prefer to receive the images via email, simply provide us with your email address. If the images are too large to email, or if DICOM images are needed, you will be emailed a link to access the images via the UT Vault, a secure file transfer service. If this is the first time you are using the UT Vault, you will be required to answer 3 simple questions to set up your account.
